

INSPIRED TEC

SYNERGISTIC TECHNOLOGY FOR AIR & SURFACE PURIFICATION

filters with **ODOGard®**

Now there is a **NEW** way to remove odors.

CAPTURES

ODOGard® seeks out odor molecules, relentlessly chasing them down until they reach the odor.

DESTROYS

ODOGard® bonds to the odor molecule itself and changes the molecular structure, eliminating the odor forever like it was never there.

Proven to take out odors and VOCs *better than any other filter on the market.*

99%

more effective than **carbon filters**

30%

less expensive than **carbon filters**

140%

more reduction in **airborne VOC**

18%

more sustainable than **MERV-13 filters**

Our HVAC and HEPA filters are the only filters to have the revolutionary, patented ODOGard® coating that eliminates odors at the molecular level, making it impossible for the odor to survive. Even the toughest, seemingly permanent odors don't stand a chance against ODOGard .

Our filters maximize air flow without making the unit work harder, while trapping particulates as small as .03 microns. Pollen and other allergens, mold, dust, pet dander, bacteria and viruses are trapped and won't return to the airspace, so you can breathe fresh, clean, odorless air.
