

**EnerGard™**  
Transforming HVAC

# INTRODUCING **BioCLEAN** CLEANER for HVAC

## About BioCLEAN

EnerGard™ BioCLEAN is an innovative cleaning system powered by living chemistry to actively break down organic contaminants, dirt, and debris. BioCLEAN not only sanitizes HVAC systems but also enhances indoor air quality, optimizes temperature and humidity control, and promotes a healthier environment.

## BioCLEAN Advantages

- ✓ **Removes Built-Up Contaminants:** Effectively eliminates materials that restrict airflow and system performance, restoring efficiency and extending HVAC equipment life.
- ✓ **Enhances Comfort and Air Quality:** Improves indoor comfort by optimizing temperature and humidity control, while enhancing air quality.
- ✓ **Cost-Effective Solution:** A significantly less expensive cleaning method that can be performed without shutting down the HVAC system.
- ✓ **Safer for Equipment and People:** Uses bioremediation, which is safer and less corrosive than toxic chemicals.

## Bioremediation Cleaner

## BioCLEAN

EnerGard™ BioCLEAN is a highly engineered solution combining microbes and surfactants to bioremediate HVAC systems. Its foaming action penetrates deep into surfaces while using minimal water, consuming organic material that blocks airflow, and sanitizing the system.

The IK Pro Sprayer turns an all-day, four-person job into a one-hour one-person job.
